

HAYLAN

E I S E N

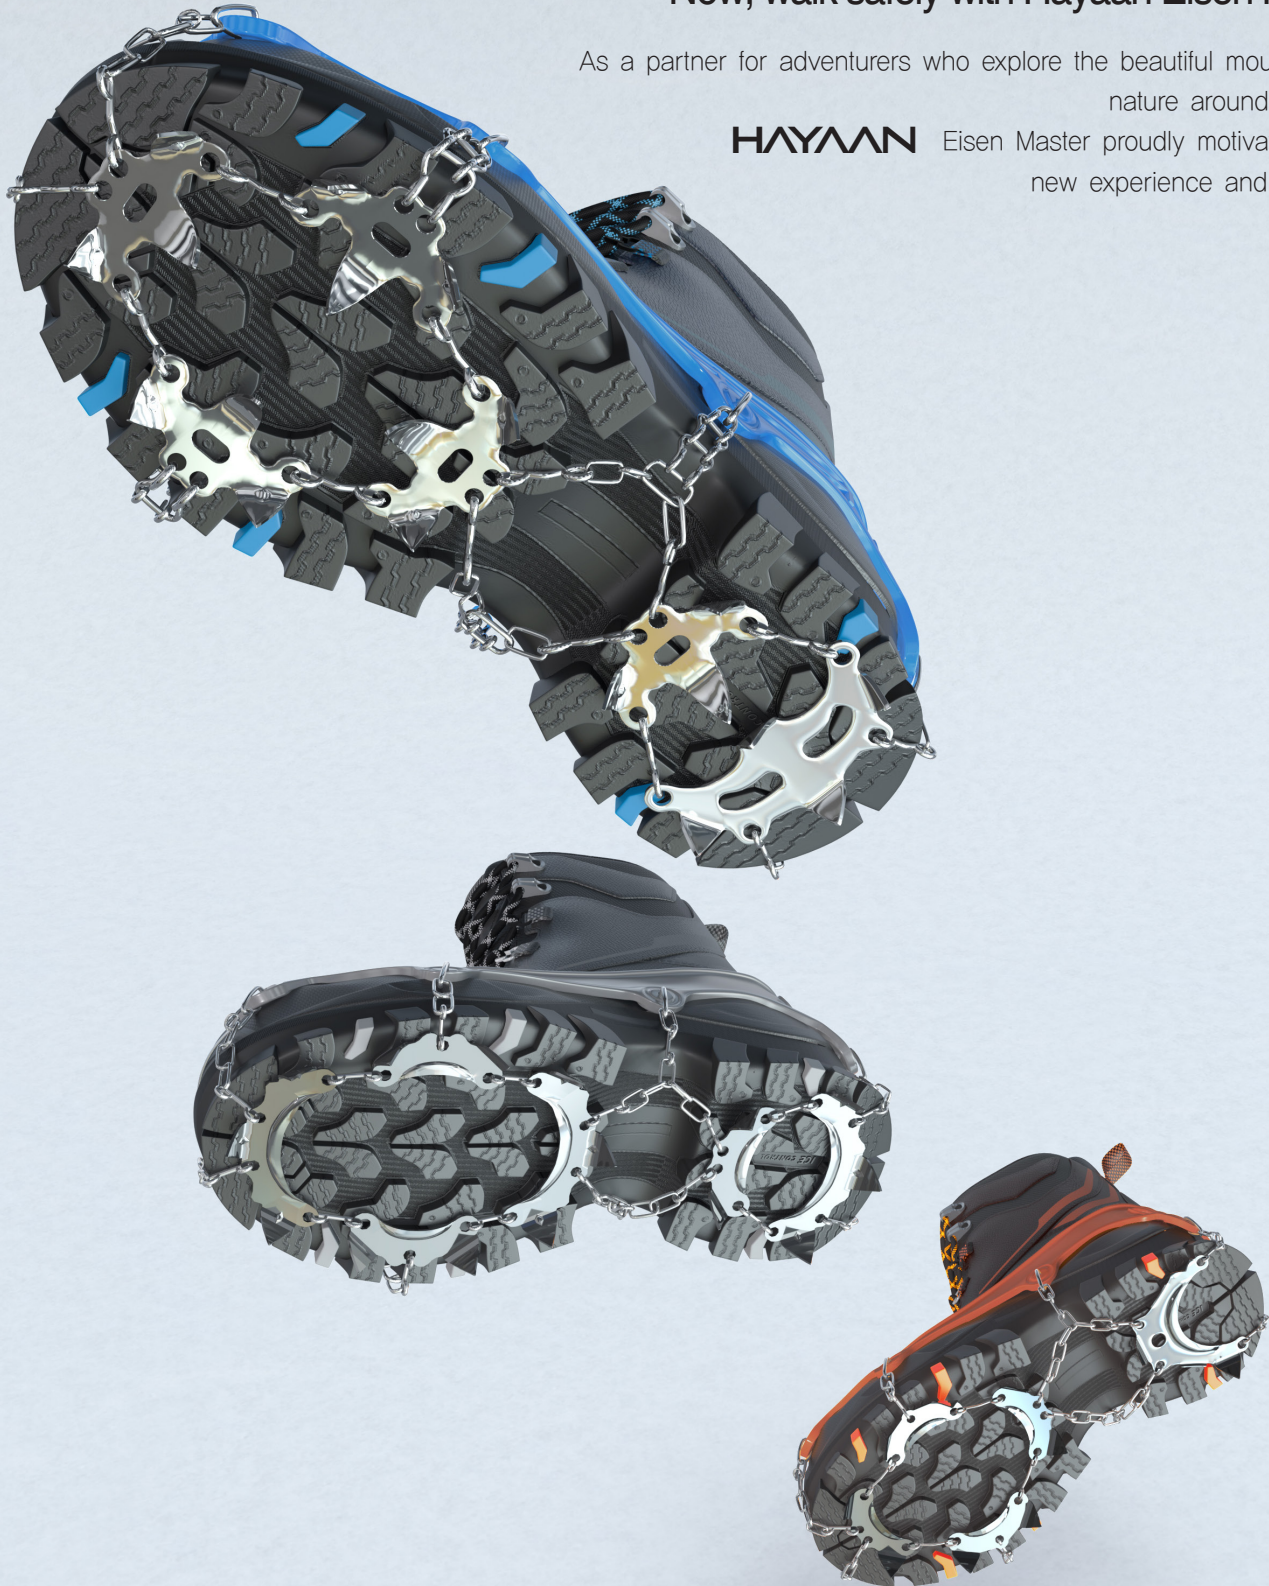

"HAYMAN Eisen Master is a hiking crampon brand, and it was founded with the technology of Daesung Precision with 25 years of metal processing experience. Hayaan Eisen Master has been created with its strong will to lead a safe and free outdoor activity culture by adding innovation to parent company's domestic and global technical awareness and quality. Hayaan Eisen Master prioritizes user's safety and comfort and its products are made in Korea for excellent durability and performance. The powerful grip force supports you stably at any site.

Now, walk safely with Hayaan Eisen Master..

As a partner for adventurers who explore the beautiful mountains and nature around the world,

HAYMAN Eisen Master proudly motivates you for new experience and challenge.

HAYMAN EISEN
MASTER

Hawk_19P

Eisen Master's Hawk Eisen features a hawk grip system to offer you the best performance, such as leveling and anti-skid, in uneven surfaces. It also uses double chains to increase product durability and stability. All metal parts are made with highly corrosion resistant stainless steel materials, and the fixing bands are made with high-strength DynaFlex that makes the crampon fit tightly into the hiking shoes.

Hawk Grip Leveling and
Antiskid Performance

DynaFlex with High Cold
Resistance and Flexibility

Double Chain for Higher
Stability

Product Specification

*Country of Origin : KOREA

*Material : Stainless Steel 420J2, 304, 204

*Weight / Size / Color

S : 340g / 230~245mm / Red brown

M : 350g / 250~265mm / Gray

L : 360g / 270~285mm / Navy

XL : 370g / 290~305mm / Navy

HAYVAN EISEN
MASTER

Pro_15P

Eisen Master Pro 15p Eisen combines Eisen Master 11P's light weight and Hawk 19P's strength. This hybrid-type product is good for both light and heavy hiking.

HAYAAN EISEN

Icon Description

Application of The Optimum Ergonomic Design

The streamlined band design is easily detachable, and the spikes and chains are connected flexibly to help you walk naturally on various hiking environments. It also makes you feel comfortable during long hikes.

DynaFlex Band

The soft and tear-resistant band keeps its high elasticity even in -60°C. With excellent cold resistance and flexibility, it fits nicely on the hiking shoes, and its shape is adjusted naturally to reduce fatigue.

Full Stainless Steel

Hayaan Eisen Master is fully applied with stainless steel for higher corrosion resistance, longer storage, and durability.

SUS304/204 : Chains SUS420J2 : Peaks

Number of Peaks

This indicates the number of peaks in Hayaan crampon products. Using more peaks may increase grip but it is necessary to test their locations, angles, and lengths. It is also important to choose the right product for different purposes, such as portability and purpose of use.

Product Weight

Heavier materials have higher strength, and thicker bands have higher tensile tension. It is recommended to choose the right product depending on surrounding environment and your hiking style.

HAWK GRIP SYSTEM

Hawk Grip System is inspired by the way a hawk grips its prey. The peaks are applied with streamlined structure to create hollow spaces and peaks move along these hollow spaces to grip the surface. It also boosts leveling and anti-skid performance for higher level of stability.

Double Chain

Double chain is applied to peaks and band connection to boost tensile force and stability.

Elastomer Band

Unlike bands made of recycled rubber, Hayaan's 4P Eisen Band uses elastomer for outstanding stretch texture, elasticity, and recoverability.

Durable peak with The Best Strength!

S50C series show higher strength compared to general steel. The carbon steel is precisely shaped and heat treated to maintain the best performance even in extreme weathers.
